

**Primary PE and Sport Premium
Action Plan 2025-2026 (reviewed)**

Review of Year Ending's spend and key achievements: 2025-2026

£19,610 (spent in full as per costings below)

Activity/Action	Impact	Comments	Actual Spend
1. Further enhance lunchtime activities for pupils which encourage widespread participation.	Funding for Teamtheme to provide a range of lunch time sporting opportunities for children enabled all year groups to take part in physical activities. Activities have developed team work, technical skills (eg: ball control), defending and attacking approaches. Games have included field and playground games.		£4,100
2. Embed the Sports Leader programme with pupils actively promoting physical activity within the school.	Pupil voice and leadership have been significantly strengthened. Trained by the PASS team and the PE Subject Leader, Sports Leaders have met bi-termly to manage equipment and plan inclusive activities. Leaders played a vital role in the wider sporting community by facilitating South Borough football/netball matches and running Sports Day events. The introduction of dedicated Sports Leader bibs boosted their visibility, allowing them to successfully lead well-attended peer-to-peer team games at lunchtimes.	Integrate Sports Leader roles into part of the new Pupil Leadership framework in 26/27.	£925
3. Continue to develop the quality of all PE lessons for all pupils.	Expert coaching and modelling, has significantly boosted staff confidence and abilities, leading to a greatly enhanced overall quality of PE lesson delivery across the school. Professional coaches have successfully upskilled teachers and support staff in key areas such as planning, resourcing, modelling, and assessment, directly improving the breadth and depth of PE provision for all pupils. Every pupil continues to receive at least two hours of high-quality PE per week.	Continue to take a needs led approach to PE/Sports CPD.	£5,225

4. Develop inclusivity of after school sports clubs (especially for disadvantaged, SEND and girls).	Funding for Teamtheme after-school clubs directly enabled greater access and engagement in sporting interests for pupils from disadvantaged backgrounds, broadening their active participation. These clubs included football, hockey, badminton, tennis and basketball. Expansion of clubs this year has also enabled the development of a KS1 mixed football team and a Y3/4 girls football team.	Continue to offer a wide range of after school clubs.	£5400.73
5. Provide a programme that develops children's cycling skills.	The fully funded Bikeability course significantly boosted road cycling confidence and safety skills for Year 6 pupils.	Look at expanding this into Reception balance bike skill development in 26/27.	£555
6. Increase opportunities for pupils to take part in a wider range of sports at a competitive level.	The purchase of medals, equipment, and trophies for the annual Sports Day effectively celebrated and reinforced the inclusion of all children in competitive sporting events within the school. Competitive sports opportunities have expanded exponentially this year through our continued PASS subscription. Moving onward from last year's successes in netball, football, and cross-country, the school has fiercely increased its footprint by competing in 5 football leagues, the netball league and cup, and a total of 9 tournaments. The school has successfully broadened its sporting horizon beyond invasion games; pupils competed in gymnastics, dance events, American football and athletics competitions.	Embed competitions both within the school and within the wider community (cross school and Trust tournaments).	£3,404.30
