SOUTH BOROUGH
Primary School

Platinum Award
2026 - 2028

Play Policy

Policy developed by: Lawrence Clarke (Deputy Headteacher)
Emily Longley (Curricular Lead for Play)

Approved and adopted by Governors: December 2024

SECTION 1 - Policy

1. Commitment

Our school is committed to providing high-quality play opportunities for all children. We will use this play policy to guide all decisions that affect children's play experiences. We are committed to providing the strategic and operational leadership needed to provide and maintain quality play provision for all of our children.

2. Rationale

Our school believes that all children need opportunities to play that allow them to explore, manipulate, experience and affect their environment. We believe play provision should be welcoming and accessible to every child, irrespective of gender, sexual orientation, economic or social circumstances, ethnic or cultural background or origin, or individual abilities.

The OPAL Primary Programme rationale is that "… *better, more active and creative play times can mean happier and healthier children, and having happier, healthier, more active children usually results in a more positive attitude to learning in school, with more effective classroom lessons, less staff time spent resolving unnecessary behavioural problems, fewer playtime accidents, happier staff and a healthier attitude to life.*"

School Values (appendix 1)

The school community has identified a set of shared values. We use our school values as guides for the way we behave, perform and interact with each other. These are explicitly taught and contribute to the development of our positive school ethos and culture for teaching. The school values are:

Respect: Respect ourselves, others and our school.

Kindness: Kind words and actions.

Determination: Be determined and aim high in everything you do.

Our school is committed to providing high-quality play opportunities for all children. We believe that play is essential for children's development, allowing them to explore, learn, and grow. By incorporating play into our curriculum, we aim to foster a positive learning environment that nurtures creativity, problem-solving, and social skills. We will ensure that our play spaces are inclusive and accessible to all children, regardless of their abilities or backgrounds. Our school values of respect, kindness and determination will guide our approach to play.

3. Definition and value of play

Play is defined as a process that is intrinsically motivated, directed by the child and freely chosen by the child. Play has its own value and provides its own purpose. It may or may not involve equipment or other people.

We believe play has many benefits, including:

- Play is critical to children's health and wellbeing, and essential for their physical, emotional, social, spiritual and intellectual development.
- Play enables children to explore the physical and social environment, as well as different concepts and ideas.
- Play enhances children's self-esteem and their understanding of others through freely chosen social interactions, within peer groups, with individuals, and within groups of different ages, abilities, interests, genders, ethnicities and cultures.
- Play requires ongoing communication and negotiation skills, enabling children to develop a balance between their right to act freely and their responsibilities to others.
- Play enables children to experience a wide range of emotions and develop their ability to cope with these, including sadness and happiness, rejection and acceptance, frustration and achievement, boredom and fascination, fear and confidence.
- Play encourages self-confidence and the ability to make choices, problem solve and to be creative.
- Play maintains children's openness to learning, develops their capabilities and allows them to push the boundaries of what they can achieve.

4. Aims

In relation to play our school aims to:

- Ensure play settings provide a varied, challenging and stimulating environment.
- Allow children to take risks and use a common-sense approach to the management of these risks and their benefits.
- Provide opportunities for children to develop their relationships with each other.
- Enable children to develop respect for their surroundings and each other.
- Aid children's physical, emotional, social, spiritual and intellectual development.
- Provide a range of environments that will encourage children to explore and play imaginatively.
- Provide a range of environments that will support children's learning across the curriculum and learning about the world around them.
- Promote independence and teamwork within children.
- Build emotional and physical resilience.
- Provide opportunities for children to regulate their emotions independently.

5. Rights

Our school recognises the UN Convention on the Rights of the Child (Link), which includes *the right to play, recreation and leisure* (Article 31) and the *right of children to be listened to on matters important to them* (Article 12). We acknowledge that we have a duty to take these rights seriously and listen to children's views on their play.

6. Benefit and risk

'Play is great for children's wellbeing and development. When planning and providing play opportunities, the goal is not to eliminate risk, but to weigh up the risks and benefits. No child will learn about risk if they are wrapped in cotton wool.'
Managing Risk in Play Provision: An Implementation Guide (Play Safety Forum, 2012)

The school will use the Health and Safety Executive guidance document *Children's Play and Leisure – Promoting a Balanced Approach* (September 2012) (Link - appendix 2) as the principal value statement informing its approach to managing risk in play. In doing so, the school will adopt a risk-benefit approach as detailed in *Managing Risk in Play Provision: An Implementation Guide (Play Safety Forum, 2012).*

Risk-taking is an essential feature of play provision and of all environments in which children legitimately spend time at play. Play provision aims to offer children the chance to encounter acceptable risks as part of a stimulating, challenging and managed play environment. As outlined in the play sector publication 'Best Play', play provision should aim to *'manage the balance between the need to offer risk and the need to keep children and young people safe from harm'*.

In addition to standard risk-benefit assessments the school will practise dynamic risk management with children, encouraging them to identify and manage risks in an environment where adults are present to support them.

7. Supervision

The law requires that children in school have supervision but for primary school playtimes there are no stated ratios. During the school day there should be one or more adults present outdoors. The school recognises OPAL's three models of supervision: Direct, Remote and Ranging (appendix 3). Except for new children in reception, whose skills and orientation in the school environment need to be assessed, the school does not believe direct supervision is possible or beneficial. Staff will use ranging and remote supervision models, so that children can quickly find an adult and adults can patrol large sites to gain an awareness of the kinds of play and levels of risk likely to be emerging.

At South Borough, we will primarily use a Ranging model of supervision. This means that supervisors will move around the play area, checking in on different zones and adjusting their attention based on the types of play and potential risks. While we will maintain a presence, we understand that direct, constant supervision isn't always necessary or beneficial for children's development.

By using a Ranging model, we aim to:

- Encourage independence: Allow children to take appropriate risks and make their own choices.
- Promote social skills: Foster cooperation and problem-solving among children.
- Enhance creativity: Encourage imaginative and creative play.
- Ensure safety: Monitor for potential hazards and intervene when necessary.

We believe this approach strikes a balance between safety and allowing children the freedom to explore and learn through play.

Additionally, we will use this time to reinforce our school values of respect, kindness, and determination. We will encourage children to demonstrate these values in their interactions with others and in their approach to play.

8. The adult's role in play

The school will help children maximise the benefits they can gain from play by the provision of trained staff who are informed by and work in accordance with the Playwork Principles. Staff will use and refer to these principles when appropriate interventions are needed, and ultimately will strive for facilitating an environment that nurtures children's self-directed play.

The playworker's core function is to create an environment that will stimulate children's play and maximise their opportunities for a wide range of play experiences. A skilled and experienced playworker is capable of enriching the child's play experience both in terms of the design and resources of the physical environment and in terms of the attitudes and culture fostered within the play setting. Playworkers are a channel of access to new materials and tools and they can act as a stimulus to children to explore and learn. They are also available to participate in the play if invited.

At South Borough, alongside the OPAL playwork principles (appendix 4), the Play Team believes that an adult's role in play involves a delicate balance of support and facilitation. By providing opportunities for exploration and creativity, adults can encourage children to take risks and develop their imagination. Through scaffolding and supporting play, adults can help children build on their ideas and problem-solving skills. It's essential to facilitate play, allowing it to flow naturally without unnecessary intervention. By observing and listening attentively, adults can identify moments to offer gentle guidance or introduce new challenges, encouraging children to push their boundaries and discover new possibilities. Ultimately, an adult's role is to advocate for play, recognising its intrinsic value and its significant contribution to a child's overall development.

9. Equality and diversity

Through providing a rich play offer meeting every child's needs we will ensure all children, regardless of age, gender, race, disability or other special needs, can develop and thrive, build strong relationships and enjoy school.

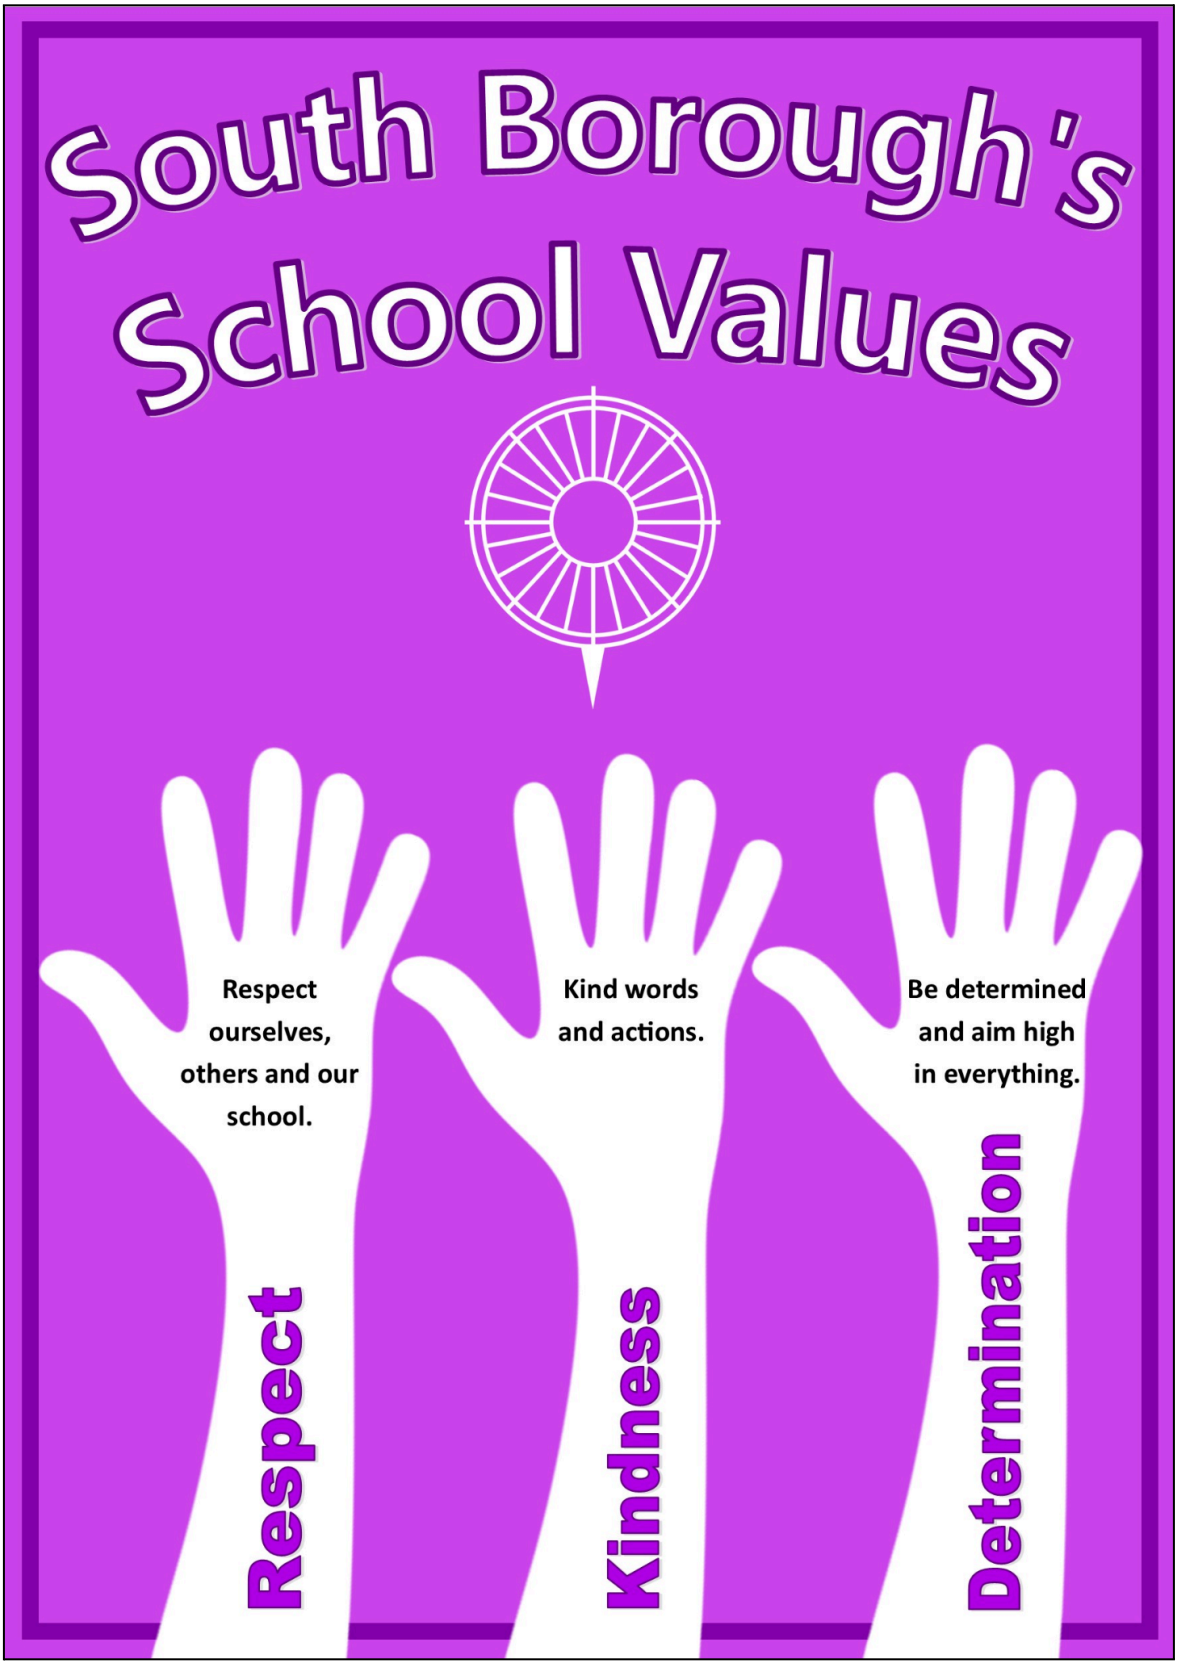

10. Environment

We believe that a rich play setting should ensure that all children have access to stimulating environments that are free from unacceptable or unnecessary risks and thereby offer children the opportunity to explore for themselves through their freely chosen play.

We will strive to continually improve the quality and diversity of our school's grounds to enhance play. We will use the document 'Best Play' to guide us on what a quality play environment should contain. www.freeplaynetwork.org.uk/pubs/bestplay.pdf

Appendix 2 - Health and Safety Executive (2012)

HSE

Health and Safety Executive

CHILDREN'S PLAY AND LEISURE – PROMOTING A BALANCED APPROACH

1. Health and safety laws and regulations are sometimes presented as a reason why certain play and leisure activities undertaken by children and young people should be discouraged. The reasons for this misunderstanding are many and varied. They include fears of litigation or criminal prosecution because even the most trivial risk has not been removed. There can be frustration with the amounts of paperwork involved, and misunderstanding about what needs to be done to control significant risks.

2. The purpose of this statement is to give clear messages which tackle these misunderstandings. In this statement, HSE makes clear that, as a regulator, it recognises the benefits of allowing children and young people of all ages and abilities to have challenging play opportunities.

3. HSE fully supports the provision of play for all children in a variety of environments. HSE understands and accepts that this means children will often be exposed to play environments which, whilst well-managed, carry a degree of risk and sometimes potential danger.

4. HSE wants to make sure that mistaken health and safety concerns do not create sterile play environments that lack challenge and so prevent children from expanding their learning and stretching their abilities.

5. This statement provides all those with a stake in encouraging children to play with a clear picture of HSE's perspective on these issues. HSE wants to encourage a focus on the sensible and proportionate control of real risks[1] and not on unnecessary paperwork. HSE's primary interest is in real risks arising from serious breaches of the law and our investigations are targeted at these issues.

Recognising the benefits of play

Key message: 'Play is great for children's well-being and development. When planning and providing play opportunities, the goal is not to eliminate risk, but to weigh up the risks and benefits. No child will learn about risk if they are wrapped in cotton wool'.

6. HSE fully recognises that play brings the world to life for children. It provides for an exploration and understanding of their abilities; helps them to learn and develop; and exposes them to the realities of the world in which they will live, which is a world not free from risk but rather one where risk is ever present. The opportunity for play develops a child's risk awareness and prepares them for their future lives.

7. Striking the right balance between protecting children from the most serious risks and allowing them to reap the benefits of play is not always easy. It is not about eliminating risk. Nor is it

[1] The Courts have made clear that when health and safety law refers to 'risks', it is not contemplating risks that are trivial or fanciful. It is not the purpose to impose urdens on employers that are wholly unreasonable (R v Chargot (2009) 2 All ER 660 [27])

about complicated methods of calculating risks or benefits. In essence, play is a safe and beneficial activity. Sensible adult judgements are all that is generally required to derive the best benefits to children whilst ensuring that they are not exposed to unnecessary risk. In making these judgements, industry standards such as EN 1176 offer bench marks that can help.

8. Striking the right balance *does* mean:

- Weighing up risks and benefits when designing and providing play opportunities and activities
- Focussing on and controlling the most serious risks, and those that are not beneficial to the play activity or foreseeable by the user
- Recognising that the introduction of risk might form part of play opportunities and activity
- Understanding that the purpose of risk control is not the elimination of all risk, and so accepting that the possibility of even serious or life-threatening injuries cannot be eliminated, though it should be managed
- Ensuring that the benefits of play are experienced to the full

9. Striking the right balance *does not* mean:

- All risks must be eliminated or continually reduced
- Every aspect of play provision must be set out in copious paperwork as part of a misguided security blanket
- Detailed assessments aimed at high-risk play activities are used for low-risk activities
- Ignoring risks that are not beneficial or integral to the play activity, such as those introduced through poor maintenance of equipment
- Mistakes and accidents will not happen

What parents and society should expect from play providers

Key message: 'Those providing play opportunities should focus on controlling the real risks, while securing or increasing the benefits – not on the paperwork'.

10. Play providers[2] should use their own judgement and expertise as well as, where appropriate, the judgement of others, to ensure that the assessments and controls proposed are proportionate to the risks involved.

11. They should communicate what these controls are, why they are necessary and so ensure everyone focuses on the important risks.

12. It is important that providers' arrangements ensure that:

- The beneficial aspects of play - and the exposure of children to a level of risk and challenge - are not unnecessarily reduced
- Assessment and judgement focuses on the real risks, not the trivial and fanciful
- Controls are proportionate and so reflect the level of risk

[2] Play providers include those managing or providing play facilities or activities in parks, green spaces, adventure playgrounds, holiday playschemes, schools, youth clubs, family entertainment centres and childcare provision.

13. To help with controlling risks sensibly and proportionately, the play sector has produced the publication *Managing Risk in Play Provision: Implementation Guide* which provides guidance on managing the risks in play. The approach in this guidance is that risks and benefits are considered alongside each other in a risk-benefit assessment. This includes an assessment of the risks which, while taking into account the benefits of the activity, ensures that any precautions are practicable and proportionate and reflect the level of risk. HSE supports this guidance, as a sensible approach to risk management.

If things go wrong

Key message: 'Accidents and mistakes happen during play – but fear of litigation and prosecution has been blown out of proportion.'

14. Play providers are expected to deal with risk responsibly, sensibly and proportionately. In practice, serious accidents of any kind are very unlikely. On the rare occasions when things go wrong, it is important to know how to respond to the incident properly and to conduct a balanced, transparent review.

15. In the case of the most serious failures of duty, prosecution rightly remains a possibility, and cannot be entirely ruled out. However, this possibility does not mean that play providers should eliminate even the most trivial of risks. Provided sensible and proportionate steps have been taken, it is highly unlikely there would be any breach of health and safety law involved, or that it would be in the public interest to bring a prosecution.

September 2012

Appendix 3 - OPAL Definitions of Supervision

4. Definitions

The following are the definitions for terms used in the document and some more detailed explanation where appropriate.

Free-range play

Free-range play is where pupils are given permission to use and explore the school grounds or at least part of them without direct supervision.

Level of supervision

The number of supervisors (competent adults) undertaking supervision indicated as a ratio to number of pupils being supervised.

Type of supervision

OPAL recommends that a paragraph on the school's intended supervision styles is included in its play policy:

Direct	Remote	Ranging
This is where the supervisor(s) will be able to see all areas of play, and be nearby, around a maximum of 20 metres away. Some play features in these areas, such as playhouses or planting, may offer semi-hidden opportunities. This will be most common in nursery and reception classes.	This is where a supervisor or supervisors are located at a relatively static location at a good vantage point some distance from an activity, eg supervisor on the playground and activity 20 metres or more away, or supervisor in the middle of a flat school field. This style is widely used in other countries and its purpose is for an adult to be present to respond rapidly to an accident or serious behaviour incident.	This is where the supervisor moves around the play area, usually on a set course/ schedule. The distance from pupils therefore differs but can be 20 metres or more away. On a large site, supervisors should have zones so that they know which parts of the site they are covering, and they should modify their attention based on the kinds of play and their judgement about areas of highest risk.

Supervisor

This is the competent adult providing the supervision and can be a play team member, teacher, teaching assistant, lunchtime supervisor or a volunteer. In each case they will have been assessed as competent to provide the supervision necessary and been trained in what is acceptable practice, what to do if unacceptable risks occur and what to do in case of accidents.

Appendix 4 - The Playwork Principles

1. Understand Need

All children and young people need to play. The impulse to play is innate. Play is a biological, psychological and social necessity, and is fundamental to the healthy development and well-being of individuals.

2. Understand Process

Play is a process that is freely chosen, personally directed and intrinsically motivated. Children and young people determine and control the content and intent of their play, by following their own instincts, ideas and interests, in their own way for their own reasons.

3. Support Process

The prime focus and essence of playwork is to support and facilitate the play process and this should inform the development of play policy, strategy, training and education.

4. Advocate for Play

For playworkers, the play process takes precedence and playworkers act as advocates for play when engaging with adult led agendas.

5. Create Spaces

The role of the playworker is to support all children and young people in the creation of a space in which they can play.

6. Learn and Reflect

The playworker's response to children and young people playing is based on a sound up to date knowledge of the play process, reflective practice.

7. Understand Impact

Playworkers recognise their own impact on the play space and also the impact of children and young people's play on the playworker.

8. Choose Intervention Styles

Playworkers choose an intervention style that enables children and young people to extend their play. All playworker interventions must balance risk with the developmental benefit and well-being of children.
